

System Administrator

Headquartered downtown in the heart of the National Capital region, Privacy Analytics is a one-of-a-kind health data analytics company. We are the first and only de-identification software provider in the world. Privacy Analytics is on the cutting edge of data de-identification and re-identification research and we have translated this patented research into an amazing offering of products and services that enable researchers to access and analyze healthcare data while ensuring that individuals' identities are protected.

Even though our customers include 7 of the top 10 Fortune 500 healthcare organizations, we've remained loyal to the entrepreneurial and innovate spirit that drove the founding of the company and continues to permeate our office and culture.

The Job:

We're searching for an intermediate System Administrator to take on a one-year contract. The sysadmin will play a key IT support role on the new Specialty Pharma project team, setting up and managing servers and IT systems. Our ideal candidate is highly analytical; a natural problem-solver with the patience and interpersonal savvy to succeed in a dynamic, ever-changing environment. You're flexible and adaptable, able to provide on-call support during off-hours, and even help out moving servers and other equipment when required.

Responsibilities:

- Windows and Linux system administration, including Active Directories and Exchange Servers.
- Ensure the secure handling of data.
- Provide level 1 and 2 IT support to on-site and remote users.

Qualifications:

- 3-5 years' system administration experience, on both Windows and Linux platforms.
- Strong understanding of Linux, Windows Server 2008-2014, Exchange 2010-2016, Active Directory, and VMWare ESX.
- Strong communication skills.
- Excellent problem-solving and troubleshooting skills.
- Logical and methodical.

Experience/skills in the following are assets:

- MS SQL 2008-2014, MS Lync.
- Cisco networking technologies.
- IT asset management software.

- KVM technology.
- DNS, DHCP, VDI.
- Disk encryption technologies.
- HIPAA.
